Developer Tools: Git, Google Cloud Platform, Azure, AWS, Firebase

EXPERIENCE

Fullstack Web Developer — April 2021 – Present
Kazi Consulting — *Waterloo, ON*
- Core member of the development team, worked with CSS, HTML, and JavaScript, to craft client-facing problems
- Have developed **3** web applications, mainly leveraging **React, TypeScript, and Firebase** as the tech stack, with various custom **REST API** implementations
- On average, the web overhauls I've completed have lead to a **40%** increase in site traffic and interactions

Analyst — January 2022 – April 2022
Traffic Tech — *Mississauga, ON*
- Communicated with various companies such as **Walmart, Loblaws, and Costco** to plan moving of their goods.
- Handled over **$75,000** of commerce daily by importing and tracking sales transactions
- Imported various data sets into company system using custom written **Python** scripts
- collected and stores data on sales numbers, market research, logistics, linguistics, or other behaviors

Business Intelligence Analyst — September 2022 – December 2022
OSL Retail Services — *Toronto, ON*
- Worked with **APIs** to pull data from websites and transition to external data point.
- Created a vault application to store data and passwords using **Python**
- Worked with **Knime software** to analyze various data
- Converted data from **PostgreSQL** to **SQL**
- supported planning and coordination of **Data Governance** activities

PROJECTS

Decider | *NextJS, React, TypeScript, Material-UI* — https://decider-rouge.vercel.app/
- An easy to use web application to help you make decisions leveraging NextJS, and React.
- Developed using **NextJS, React,** and **TypeScript**, this dynamic web app works flawlessly on mobile and web environments
- The front-end was designed with both custom **CSS** components as well as **Material-UI**, specifically leveraging the global theme attributes of this tool

DigiNote | *MongoDB, ExpressJS, ReactJS, NodeJS, JavaScript, Bootstrap* — https://diginote-1.herokuapp.com/
- The one and only replacement you'll ever need for the traditional sticky note!
- Developed using the **MERN** stack and **JavaScript**, this web application allows users to create meaningful notes that are quick and easy to access. Your notes are safe and secure with **JWT auth** and data encoding.
- Leveraged **Bootstrap** in conjunction with custom **CSS** for the overall design and **UI/UX** of this project

WeText | *NodeJS, Express, JavaScript, Socket.io* — https://we-text-amb.herokuapp.com/
- A Realtime Global Chatting Interface
- Developed using **NodeJS, Express,** and **JavaScript**, this web application leverages **Web Sockets** for real-time communication.
- Leveraged **Bootstrap** in conjunction with custom **CSS** for the overall design and **UI/UX** of this project

EDUCATION

University of Waterloo — Waterloo, ON
Candidate for Bachelor of Liberal and Business studies, Honours — GPA: 3.0 — *September 2020 – May 2025*
